# FIRST BANK OF DELAWARE NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### **Note 1: Organization**

First Bank of Delaware, referred to as "we," "FBD," the "Bank" or the "Company," is a commercial bank chartered pursuant to the laws of the State of Delaware, which commenced operations in June 1999. Our principal office is located at Brandywine Commons II, 1000 Rocky Run Parkway, Wilmington, Delaware, and our telephone number is (302) 529-5984. As a Delaware chartered bank, we are subject to the regulation and examination of the Office of the State Bank Commissioner of the State of Delaware. As a state chartered bank which is not a member of the Federal Reserve System, we are also subject to examination and comprehensive regulation by the Federal Deposit Insurance Corporation ("FDIC"). The deposits which are held by us are insured up to applicable limits by the Deposit Insurance Fund of the FDIC. We operate a traditional community banking business, as well as a consumer products division from which we derive a majority of our net income. We have also engaged in mezzanine financing, but discontinued those operations during 2008.

We presently conduct our principal community banking activities through our two offices in Wilmington, Delaware. We offer a variety of credit and depository banking services. Our commercial loan services are primarily offered to individuals and businesses in the Delaware area through two offices in New Castle County, Delaware.

Our consumer products division is comprised of two business segments, consumer loans and card products. We make consumer installment loans nationally via the Internet and telephone. Credit and prepaid card products are similarly offered nationally. The majority of loan balances and credit card receivables resulting from these products are sold without recourse. From the time we introduced our consumer products until 2008, we primarily relied on third parties to market and service these loans and cards. As a result of a consent order which we entered into with the FDIC in October 2008, we have reduced our reliance on third parties and made significant changes in our consumer products division. We have terminated most of the third party relationships through which such loans and cards were marketed and serviced, and have begun offering these products directly with assistance from professional marketers and service providers.

Our consumer products division offers consumer loans and card products primarily to customers with special credit needs who have been underserved by traditional lending institutions. We have previously described the business segments and customers of our consumer products division as "subprime". While a typical customer of our consumer products division may have a weakened credit history or reduced repayment capacity, there is no universally accepted definition of "subprime" and we believe that the use of the term creates confusion with the subprime mortgage crisis that began in 2007. We have not made subprime mortgage loans, either through our consumer products division or our community banking business. Accordingly, we have discontinued our use of the term "subprime". This change, however, should not be interpreted as reflecting any change in credit characteristics of our customers, or the business of our consumer products division.

FBD encounters vigorous competition for market share from bank holding companies, national and regional banks and other community banks, thrift institutions and other non-bank financial organizations, such as mutual fund companies, insurance companies and brokerage companies.

FBD is subject to regulations of certain state and federal agencies. These regulatory agencies periodically examine FBD for adherence to laws and regulations. This regulatory framework contributes to our cost of doing business, and any changes in applicable laws or regulations, or the results of any examination could result in additional cost or otherwise adversely effect our operations

#### **Note 2:** Summary of Significant Accounting Policies:

#### Basis of Presentation:

The Company follows accounting standards set by the Financial Accounting Standards Board ("FASB"). The FASB sets generally accepted accounting principles ("GAAP") that are followed to ensure consistent reporting of financial condition, results of operations, and cash flows. Over time, the FASB and other GAAP-setting bodies have issued standards in the form of FASB Statements. Interpretations, Staff Positions, EITF Abstracts, AICPA Statements of Position, and Practice Bulletins. The FASB recognized the complexity of its standard setting process and embarked on a revised process in 2004 that culminated in the release of the FASB Accounting Standards Codification ("ASC") on July 1, 2009. The ASC does not change how the Company accounts for its transactions or the nature of related disclosures made, nor does it impact the Company's financial position or results of operations. It simply took thousands of individual pronouncements that comprise GAAP and reorganized them under accounting topics using a consistent structure. References to GAAP in this Quarterly Report on Form 10-Q have been updated to refer to topics in the ASC. This change was made effective by the FASB for periods ending on or after September 15, 2009.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009.

#### Risks and Uncertainties and Certain Significant Estimates:

Our business is subject to various risks including the following:

Our earnings include significant amounts of consumer loan and credit card product fee income, as well as net interest income, which is the difference between interest earned on its interest-earning assets, such as loans and investments, and the interest paid on its interest-bearing liabilities, such as deposits and borrowings. Accordingly, our results of operations are subject to risks and uncertainties surrounding our exposure to changes in the interest rate environment. For example prepayments on fixed rate loans and mortgage-backed securities vary significantly and may cause significant fluctuations in our net interest margin. Our results of operations will be significantly affected by the ability of borrowers to repay their loans and many consumer borrowers, including consumer installment loan customers and credit card customers, are considered to be high credit risks. Further, litigation in connection with such consumer loans and card products, if successful, and if not reimbursed by loan servicers and card marketers obligated to indemnify FBD, could have an adverse impact on earnings and financial condition.

Interest rate risk has been maintained at relatively modest levels. The commercial loan portfolio is comprised primarily of either variable rate loans or of fixed rate loans which generally have repricing periods

of five years or less. Consumer loans generally have terms of two years or less. Only modest amounts of long term mortgage backed securities (approximately \$7.9 million), are owned, further limiting interest rate risk. While there is higher prepayment risk on these longer term securities, the amount is limited to the \$7.9 million of mortgage backed securities owned as of September 30, 2009.

The primary marketer for our credit cards generated credit card products which resulted in revenues greater than 10% of total revenues. In third quarter 2009, revenues totaled \$1.4 million, which represented 28.1% of total revenues of \$4.9 million. In third quarter 2008, that company marketed credit cards which generated \$933,000, which represented 14.6% of total revenues of \$6.4 million. In the first nine months of 2009 revenues totaled \$4.3 million or 29.0% of total revenues of \$14.8 million compared to \$4.0 million or 17.5% of revenues totaling \$22.7 million in 2008. That marketer is currently the Bank's sole credit card marketer. In September of 2009, it was decided, by the Bank and its marketer, that the accounts related to this marketer would be closed to new purchases. These accounts will be transferred to the marketer at par and the Bank will no longer own the accounts. This will have a material adverse effect on earnings.

Our consumer loans generally have principal amounts of \$2,500 or less with terms of up to 24 months. Legislation eliminating or limiting interest rates upon such loans and upon credit cards has from time to time been proposed.

We generate substantial fee income after we sell or participate loans and credit card balances at par to various purchasers, based on the amounts of such balances or on the number of accounts outstanding. Should purchasers be unable to acquire funding, sales might be curtailed or eliminated with a material reduction in income.

On October 9, 2008, the Bank entered into a cease and desist stipulation and consent order with the Bank's primary federal regulator, the Federal Deposit Insurance Corporation ("FDIC"), as discussed in our Annual Report on Form 10-K for the year ended December 31, 2008 and in Part II, Item 1 of this report.

As of the date of this report, we are in discussions with Visa, Mastercard and certain third parties with whom we have a relationship relative to our card products, relating to an account compromise event involving a third party merchant acquirer. As a member of Visa and Mastercard, we may be responsible for amounts relating to this event. We have received the actual loss amount from VISA for the actual fraud losses and other costs. This amount totals \$1.4 million. We are seeking reimbursement of this amount from third parties and insurance. We have not recorded any amounts for this claim as of September 30, 2009.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant estimates are made by management in determining the allowance for loan losses, carrying values of other real estate owned, other than temporary impairment of investment securities and restricted stock and the realization of deferred tax assets. Consideration is given to a variety of factors in establishing these estimates.

Restricted stock, which represents required investment in the common stock of correspondent banks, is carried at cost and as of September 30, 2009 and December 31, 2008, consists of the common stock of the FHLB of Pittsburgh and Atlantic Central Bankers Bank. In December 2008, the FHLB of Pittsburgh notified member banks that it was suspending dividend payments and the repurchase of capital stock.

Management's determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of their cost is influenced by criteria such as (1) the significance of the decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the FHLB.

Management believes no impairment charge is necessary related to the restricted stock as of September 30, 2009.

In estimating the allowance for loan losses, management considers current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, borrowers' perceived financial and managerial strengths, the adequacy of underlying collateral, if collateral dependent, or present value of future cash flows and other relevant factors. Since these estimates are dependent, to a great extent, on the general economy and other conditions that may be beyond FBD's control, it is at least reasonably possible that the estimates could differ materially in the near term.

In estimating other than temporary impairment of investment securities, securities are evaluated on at least a quarterly basis, and more frequently when market conditions warrant such an evaluation, to determine whether a decline in their value is other-than-temporary. To determine whether a loss in value is other-than-temporary, management utilizes criteria such as the reasons underlying the decline, the magnitude and duration of the decline and the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for an anticipated recovery in the fair value. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized.

In evaluating our ability to recover deferred tax assets, management considers all available positive and negative evidence, including our past operating results and our forecast of future taxable income. In determining future taxable income, management makes assumptions for the amount of taxable income, the reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. These assumptions require us to make judgments about our future taxable income and are consistent with the plans and estimates we use to manage our business. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. An increase in the valuation allowance would result in additional income tax expense in the period and could have a significant impact on our future earnings.

In estimating the value of other real estate owned, management considers the information available to determine net realizable value. However, the actual net realizable value is not known until the disposition of the property.

We are subject to federal and state regulations governing virtually all aspects of our activities, including, but not limited to, lines of business, liquidity, investments, the payment of dividends and others. Such regulations and the cost of adherence to such regulations can have a significant impact on earnings and financial conditions. Recent legislation, including the Credit Card Accountability, Responsibility and Disclosure (CARD) Act of 2009, and proposals for new legislation, including bills introduced in the U.S. House of Representatives and Senate, which propose the creation of a "Consumer Financial Protection

Agency", could significantly alter the regulatory framework on which we operate, and reduce the profitability of products we currently offer or which we plan to offer.

#### Stock Based Compensation:

The Company maintains a Stock Option Plan and Restricted Stock Plan (the "Plan") under which the Company grants options to its employees, directors and independent contractors and consultants who perform services for the Company. Under terms of the plan, 1.5 million shares of common stock are reserved for awards under the Plan. The Plan provides that the exercise price of each option granted equals the market price of the Company's stock on the date of grant. Any options granted vest within one to five years and have a maximum term of 10 years.

A summary of the activity related to the Company's stock options granted under the Plan during the nine months ended September 30, 2009 and 2008 is presented below:

For the Nine Months	Ended September 50,
2009	2008

	200	9	200	08
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding, beginning of year	905,251	\$ 2.54	1,029,988	\$ 2.49
Granted	108,000	1.33	59,000	2.76
Exercised	(17,600)	0.78	(24,200)	1.38
Forfeited	(60,375)	2.57	(236,686)	2.66
Outstanding, end of period	935,276	2.43	828,102	2.64
Options exercisable at period-end	556,276	2.61	632,102	2.54
Weighted average fair value of options granted during the period		\$ 0.66		\$ 0.94

# For the Nine Months Ended September 30.

	September 50,				
	2009	2008			
Number of options exercised	17,600	24,200			
Cash received	\$ 13,728	\$ 33,495			
Intrinsic value	20,944	20,928			
Tax benefit	7,121	7,325			

The following table summarizes information about options outstanding under the Plan as of September 30, 2009.

	Opti	ions outstandi	ng		Options ex	Options exercisable		
Range of Exercise Prices	Shares	Weighted Average remaining contractual life (years)	Weighted Average exercise price	-	Shares	Weighted Average Exercise Price		
\$1.01 to \$1.50	111,850	9.0	\$ 1.33		3,850	\$ 1.20		
\$1.51 to \$1.99	102,700	8.9	1.65		2,700	1.64		
\$2.00 to \$2.69	218,826	5.0	2.50		218,826	2.50		
\$2.70 to \$3.10	501,900	6.2	2.80		330,900	2.71		
	935,276		\$ 2.43	<del>-</del>	556,276	\$ 2.61		

During the three months ended September 30, 2009, \$23,000 was recognized in compensation expense, with a 34% assumed tax benefit, for the Plan. During the nine months ended September 30, 2009, \$69,000 was recognized in compensation expense, with a 34% assumed tax benefit, for the Plan. During the three months ended September 30, 2008, \$16,000 was recognized in compensation expense, with a 35% assumed tax benefit, for the Plan. During the nine months ended September 30, 2008, \$57,000 was recognized in compensation expense, with a 35% assumed tax benefit, for the Plan. The fair value of each option granted in 2009 is estimated on the date of the grant using the Black-Scholes option-pricing model with the following weighted average assumptions used for those grants: dividend yield of 0%; expected volatility of 45.52%; risk-free interest rate of 1.99% and an expected life of 7.0 years. At September 30, 2009, there were 379,000 unvested options with a fair value of \$329,000 with \$175,000 of that amount remaining to be recognized as expense. At that date, the intrinsic value (the excess of the market price over the exercise price) of the 935,276 options outstanding was \$19,015, while the intrinsic value of the 556,276 exercisable (vested) options was \$1,155. During the nine months ended September 30, 2009, 60,375 options were forfeited with a weighted average grant fair value of \$154,873.

#### **Note 3:** Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board ("FASB") issued an update to Accounting Standard Codification 105-10, "Generally Accepted Accounting Principles". This standard establishes the FASB Accounting Standard Codification ("Codification" or "ASC") as the source of authoritative U.S. GAAP recognized by the FASB for nongovernmental entities. The Codification is effective for interim and annual periods ending after September 15, 2009. The Codification is a reorganization of existing U.S. GAAP and does not change existing U.S. GAAP. We adopted this standard during the third quarter of 2009. The adoption had no impact on our financial position, results of operations, and earnings per share.

In August 2009, the FASB issued Accounting Standards Update ("ASU") 2009-5, "Measuring Liabilities at Fair Value", which updates ASC 821-10, "Fair Value Measurements and Disclosures". The updated guidance clarifies that the fair value of a liability can be measured in relation to the quoted price of the liability when it trades as an asset in an active market, without adjusting the price for restrictions that prevent the sale of the liability. This guidance is effective beginning October 1, 2009. We do not expect the adoption of this guidance to have an impact on our financial statements.

In June 2009, the FASB issued new guidance impacting FASB ASC 860, Transfers and servicing (Statement No. 166, Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140). This codification prescribes the information that a reporting entity must provide in its financial reports about a transfer of financial assets; the effects of a transfer on its financial position, financial performance and cash flows; and a transferor's continuing involvement in transferred financial assets. Specifically, among other aspects, ASC 860 amends Statement of Financial Standard No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, or SFAS 140, by removing the concept of a qualifying special-purpose entity from SFAS 140 and removes the exception from applying FIN 46(R) to variable interest entities that are qualifying special-purpose entities. It also modifies the financial-components approach used in SFAS 140. ASC 860 is effective for fiscal years beginning after November 15, 2009. We have not determined the effect that the adoption of ASC 860 will have on our financial position or results of operations.

In June 2009, the FASB issued new guidance impacting FASB ASC 810-10, Consolidation (Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*. The new guidance amends tests for variable interest entities to determine whether a variable interest entity must be consolidated. FASB ASC 810-10 requires an entity to perform an analysis to determine whether an entity's variable interest or interests give it a controlling financial interest in a variable interest entity. This standard requires ongoing reassessments of whether an entity is the primary beneficiary of a variable interest entity and enhanced disclosures that provide more transparent information about an entity's involvement with a variable interest entity. The new guidance will become effective for fiscal years beginning after November 15, 2009. We have not determined the effect that the adoption of ASC 810-10 will have on our financial position or results of operations.

In June 2009, the FASB issued FASB ASC 105-10, Generally Accepted Accounting Principles (Statetment No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*). The new guidance replaces SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, to establish the *FASB Accounting Standards Codification* as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in preparation of financial statements in conformity with generally accepted accounting principles in the United States. The new guidance became effective for interim and annual periods ending after September 15, 2009. The adoption of this guidance did not have an impact on our financial position or results of operations.

In April 2009, the FASB issued new guidance impacting FASB ASC 820, Fair Value Measurements and Disclosures (FASB Staff Position (FSP) No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP FAS 157-4)). FASB ASC 820, defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. FASB ASC 820 provides additional guidance on determining when the volume and level of activity for the asset or liability has significantly decreased. The FSP also includes guidance on identifying circumstances when a transaction may not be considered orderly.

FASB ASC 820 provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from

that market is needed and significant adjustments to the related prices may be necessary to estimate fair value in accordance with Statement 157.

This ASC clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The FSP provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

This ASC is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. We adopted this pronouncement in second quarter 2009 and it had no impact on our financial statements.

#### **Note 4:** Segment Reporting

Our reportable segments represent strategic businesses that offer different products and services. The segments are managed separately because each segment has unique operating characteristics, management requirements and marketing strategies. We have three reportable segments: community banking; consumer loans (formerly "subprime consumer loans"); and card products (formerly "subprime card products"). As a result of market conditions, the Bank made a strategic decision to discontinue its mezzanine finance business effective July 1, 2008. In the following table for 2008, the mezzanine segment has been reclassified to the community banking segment. The community banking segment is primarily comprised of the results of operations and financial condition of commercial loan, electronic payments products and deposit operations. We additionally offer consumer products to the underbanked consumer including consumer installment loans and credit cards. Consumer loans are loans with principal amounts of \$2,500 or less and terms of 120 days to 24 months. These loans typically are made in states that are outside of Delaware via the internet through a small number of marketers with rates and fees significantly different from other loan products offered. We perform underwriting, customer service and collection functions ourselves, or through directly contracted third parties. We also offer card products, which consist of prepaid and credit cards, on a national basis through a small number of marketers. The majority of these installment loans and credit card receivables are sold or participated. As a result of discussions with the FDIC, most third party relationships involved in generating these loans and credit cards have been terminated, which materially has reduced and continues to reduce revenues. The headings for the unsecured consumer loan and credit card segments were changed to avoid confusion with subprime mortgage loans, which the Bank has never made. The credit characteristics of consumer loan and card borrowers may include weakened credit histories that include payment delinquencies and possibly more severe problems such as charge-offs, judgments, and bankruptcies. They may also display reduced repayment capacity as measured by credit scores, debt-to-income ratios, or other criteria that may encompass borrowers with incomplete credit histories.

We evaluate the performance of the community banking segment based upon net income, return on equity and return on average assets. Consumer installment loans and card products are evaluated based upon net income.

# Segment information for the three and nine months ended September 30, 2009 and 2008, is as follows:

As of and for the three months ended September 30, 2009

#### **Note 5:** Earnings Per Share:

Earnings per share ("EPS") consists of two separate components: basic EPS and diluted EPS. Basic EPS is computed by dividing net income by the weighted average number of common shares outstanding for each period presented. Diluted EPS is calculated by dividing net income by the weighted average number of common shares outstanding plus dilutive common stock equivalents ("CSEs"). CSEs consist of dilutive stock options granted through FBD's stock option plan. The following table is a reconciliation of the numerator and denominator used in calculating basic and diluted EPS. CSEs which are anti-dilutive are not included in the following calculation. At September 30, 2009 there were 823,426 options which were antidilutive and therefore excluded from the calculation. At September 30, 2008, there were 795,152 options which were antidilutive due to the option exercise price being greater than the average market price for the period.

The following table is a comparison of EPS for the three and nine months ended September 30, 2009, and 2008.

	Three months ended September 30, 2009 2008						
Net Income	\$483,000		\$925,000

Comprehensive income	\$ 504	\$ 937	\$ 1,165	\$ 4,539			

# **Note 7:** Fair Value of Financial Instruments:

Management uses its best judgment in estimating the fair value of our financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective period ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year-end.

FBD follows the guidance issued under ASC 820, Fair Value Measurements and Disclosures, which defines fair value, establishes a framework for measuring fair value under GAAP, and identifies required disclosures on fair value measurements.

ASC 820-10 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under ASC 820-10 are described below:

#### Basis of Fair Value Measurement:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and observable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The Bank's cash instruments are generally classified within level 1 or level 2 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency.

The types of instruments valued based on quoted prices in markets that are not active, broker or dealer quotations, or alternative pricing sources with reasonable levels of transparency for securities which the Bank owns may include investment-grade bonds and mortgage products. Such instruments are generally classified within level 2 of the fair value hierarchy.

Level 3 is for positions that are not traded in active markets or are subject to transfer restrictions, with valuations adjusted to reflect illiquidity and/or non-transferability, based on available market evidence. In the absence of such evidence, management's best estimate is used. Subsequent to inception, management only changes level 3 inputs and assumptions when corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalizations and other transactions across the capital structure, offerings in the equity or debt markets, and changes in financial ratios or cash flows. The Bank does not have any such securities at present.

For assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used at September 30, 2009 and December 31, 2008 are as follows:

Description	September 30, 2009	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Unobservable Inputs
		(In Tho	usands)	
Securities available for sale	\$ 12,874	<u> </u>	\$ 12,874	\$ -
Description	December 31, 2008	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Unobservable Inputs
		(In Tho	usands)	
Securities available for sale	\$ 22,631	<u> </u>	\$ 22,631	<u> </u>

For assets measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy used at September 30, 2009 and December 31, 2008 are as follows:

Description	September 30, 2009	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Unobservable Inputs		
		(In Thou	usands)			
Impaired loans	\$ 5,062	<u> </u>	\$ -	\$ 5,062		
Other real estate owned	\$ 1,049	\$ -	\$ -	\$ 1,049		

Description	December 31, 2008	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Unobservable Inputs
		(In Thou	isands)	
Impaired loans	\$ 1,080	<u> </u>	\$ -	\$ 1,080
Other real estate owned	\$ 293	\$ -	\$ -	\$ 293

The recorded investment in loans which are impaired totaled \$5.8 million at September 30, 2009 and \$2.1 million at December 31, 2008, and the amount of related valuation allowances was \$786,000 and \$1.0 million respectively of those dates.

Other real estate owned consists of assets acquired through, or in lieu of, loan foreclosure. They are held for sale and are initially recorded at fair value at the date of foreclosure, establishing a new cost basis.

#### Cash and Cash Equivalents (Carried at Cost):

The carrying amounts reported in the balance sheet for cash and cash equivalents approximate those assets' fair values.

#### **Investment Securities:**

The fair value of securities available for sale (carried at fair value) and held to maturity (carried at amortized cost) is determined by matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted prices. Internal cash flow models using a present value formula that includes assumptions market participants would use along with indicative exit pricing obtained from broker/dealers (where available) were used to support fair values of certain Level 3 investments. The types of instruments valued based on quoted market prices in active markets include all of the Company's U.S. government and agency securities, municipal obligations and corporate bonds and trust preferred securities. Such instruments are generally classified within level 1 or level 2 of the fair value hierarchy. As required by ASC 820-10, the Bank does not adjust the quoted price for such instruments.

The types of instruments valued based on quoted prices in markets that are not active, broker or dealer quotations, or alternative pricing sources with reasonable levels of transparency for securities which the bank owns may include investment- grade corporate bonds, municipal obligations, and trust preferred securities. Such instruments are generally classified within level 2 of the fair value hierarchy.

Level 3 is for positions that are not traded in active markets or are subject to transfer restrictions, and may be adjusted to reflect illiquidity and/or non-transferability, with such adjustment generally based on available market evidence. In the absence of such evidence, management's best estimate is used. Subsequent to inception, management only changes level 3 inputs and assumptions when corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalizations and other

transactions across the capital structure, offerings in the equity or debt markets, and changes in financial ratios or cash flows. The bank has never owned any Level 3 securities.

#### **Loans Receivable (Carried at Cost):**

The fair values of loans are estimated using discounted cash flow analyses, using market rates at the balance sheet date that reflect the credit and interest rate-risk inherent in the loans. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Generally, for variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values.

#### Other Real Estate Owned (Generally Carried at Fair Value):

These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.

#### **Restricted Stock (Carried at Cost):**

The carrying amount of restricted stock approximates fair value, and considers the limited marketability of such securities.

# Accrued Interest Receivable and Payable (Carried at Cost):

The carrying amount of accrued interest receivable and accrued interest payable approximates its fair value.

#### **Bank Owned Life Insurance:**

The fair value of bank owned life insurance is based on the estimated realizable market value of the underlying investments and insurance reserves.

#### **Deposit Liabilities (Carried at Cost):**

The fair values disclosed for demand deposits (e.g., interest and noninterest checking, passbook savings and money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities on time deposits.

#### Off-Balance Sheet Financial Instruments (Disclosed at Cost):

Fair values for the Company's off-balance sheet financial instruments (lending commitments and letters of credit) are based on fees currently charged in the market to enter into similar agreements, taking into account, the remaining terms of the agreements and the counterparties' credit standing.

The estimated fair values of the Company's financial instruments were as follows at September 30, 2009 and December 31, 2008.

	Septembe	r 30, 2009	<b>December 31, 2008</b>			
(Dollars in Thousands)	Carrying Amount	Fair Value	Carrying Amount	Fair Value

# **Note 9: Subsequent Events:**

Subsequent events were reviewed through November 13, 2009.

# ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of significant changes in FBD's results of operations, financial condition and capital resources presented in the accompanying consolidated financial statements. This discussion should be read in conjunction with the accompanying notes to the consolidated financial statements.

Certain statements in this document may be considered to be "forward-looking statements" as that term is defined in the U.S. Private Securities Litigation Reform Act of 1995, such as statements that include the words "may," "believes," "expect," "estimate," "project," 'anticipate," "should," "intend," "probability," "risk," "target," "objective" and similar expressions or variations on such expressions. The forward-looking statements contained herein are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. For example, risks and uncertainties can arise with changes in: general economic conditions, including their impact on capital expenditures; new service and product offerings by competitors and price pressures; and similar items. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis only as of the date hereof. FBD undertakes no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances that arise after the date hereof, except as may be required by applicable law or regulations. Readers should carefully review the risk factors described in other documents FBD files from time to time with the FDIC.

#### Consumer Installment Loans

Installment loans are fully amortizing unsecured loans of \$2,500 or less with a term of up to 24 months and have anywhere between 4 and 48 scheduled repayments. These loans are offered via the internet and telephone. Customers must have an active checking account, valid identification and a regular source of income. Customers must meet additional credit underwriting criteria which may include minimum FICO credit scores and debt to income thresholds. Upon approval, a customer is provided a loan agreement, which he or she signs, and the funds are then electronically deposited into the customer's account. Principal and interest payments are due at least monthly. Customers may repay their loans via ACH transactions from their bank account, by personal check or by money order. These loans carry an annual interest rate of approximately 87% to 334%. Loans that were previously offered had terms of up to 120 months, but we no longer make those loans and none are on our balance sheet.

We derive our authority to charge these rates of interest on these loans from the Federal Deposit Insurance Act, which authorizes a state chartered, FDIC-insured bank to charge the highest interest rates allowed under the law of the state where the bank is located. As a Delaware state-chartered depository institution, the Bank is subject to the interest rate laws of the State of Delaware, which do not impose limits on the rate of interest Delaware banks may charge on these loans.

Consumer installment loans were previously offered through unaffiliated third party marketers and servicers with whom we contracted and who own the internet sites at which the loans are marketed. We have terminated our arrangements with these servicers and now offer our products directly, and may utilize professional marketers to help us obtain customers. We perform underwriting, customer service and collection functions ourselves, or through directly contracted third parties. We have developed an infrastructure, including oversight, to support the products, as a result of our consent order and discussions with the FDIC.

We sell the majority of our consumer loans or participations in these loans to third party investors and plan on continuing this practice. The credit characteristics of borrowers may include weakened credit histories that include payment delinquencies and possibly more severe problems such as charge-offs, judgements, and bankruptcies. They may also display reduced repayment capacity as measured by credit scores, debt-to-income ratios, or other criteria that may encompass borrowers with incomplete credit histories.

We currently originate loans via the internet or by telephone, which are mostly sold or participated to third parties. These third party buyers are investors or investment groups familiar with the industry. These loans are sold or participated on a non-recourse basis and the investors bear the risk of loss for any defaults on these loans. We retain a portion of the income on these sold loans, which is recorded as non-interest income. We also retain some of the loans we originate and bear the risk of loss for any defaults on these loans. Income on these retained loans is recorded as interest income. Per our internal guidelines, we may hold up to 25% of our capital in these loans at any one time. At September 30, 2009, there were approximately \$34.4 million of such loans outstanding of which \$4.6 million was retained on the Bank's books.

#### **Card Products**

#### Prepaid Cards

Through our membership with MasterCard International and Visa, we have become an issuing bank for prepaid cards. In third quarter 2005, we began offering prepaid cards primarily to the un-banked and under-banked customer on a national basis. Prepaid cards are cards that store information electronically on a magnetic stripe or computer chip and can be used to purchase goods or services. Funds are loaded onto cards which can be used in a manner similar to some debit/ATM cards and in some instances are similar to a MasterCard® or Visa® credit card. Prepaid cards are a substitute for cash, gift certificates and check payments. Cards can be either personalized with a customer name, non-personalized, reloadable or non-reloadable based on the type of card. Cards are issued through the internet, corporations or directly to the consumer. We have contracted with our card processors to provide front-end software platform functionality, cardholder support and card fulfillment. The bank earns revenues on these cards through interchange, monthly fees and float on the card deposits. We ceased marketing cards through several processors in the third and fourth quarters of 2008. The impact on prepaid card revenue is expected to be minimal, as we launched our own prepaid card on October 5, 2009.

#### Credit Card Products

We are an issuing bank for certain credit card programs. The credit characteristics of borrowers may include weakened credit histories that include payment delinquencies and possibly more severe problems such as charge-offs, judgments, and bankruptcies. They may also display reduced repayment capacity as measured by credit scores, debt-to-income ratios, or other criteria that may encompass borrowers with incomplete credit histories.

FBD originates credit card receivables and sells or participates the majority of such receivables into the secondary market without recourse. We previously offered our card products through various third parties, but have terminated all third party credit card programs as a result of our consent order and discussions with the FDIC. The credit card receivables are sold or participated on a non-recourse basis and the purchasers bear the risk of loss for any default on the receivables. FBD will close and transfer the accounts at par related to our credit card marketer in the fourth quarter of 2009. FBD will continue to service cardholders in certain terminated programs until the cards expire. Macroeconomic issues related to credit markets for loans to borrowers with weakened credit histories, could exacerbate related funding availability and costs. To the extent that these purchasers cannot obtain financing, or financing is limited, we

may have to reduce or cease originations. We earned a monthly fee for each active account, as well as a monthly management fee. In fourth quarter 2007, we began a test of our own credit card products, which we retain on the balance sheet and for which we retain all income, pay all expenses and bear the risk of loss. We terminated this test product in 2008. At September 30, 2009 FBD had \$663,000 of gross credit card receivables on its books related to two programs. In the fourth quarter of 2009, we sold the receivables related to the Banks directly marketed credit card program. These receivables totaling \$463,000 were sold for their actual net book value after reserves and no gain or loss was recorded on the sales. We plan to sell the credit card receivables related to the second program totaling \$200,000 and close the related accounts in the fourth quarter of 2009.

#### **Financial Condition:**

September 30, 2009, Compared to December 31, 2008

Total assets increased \$15.5 million to \$131.7 million at September 30, 2009, versus \$116.2 million at December 31, 2008. This increase reflected an \$19.8 million increase in fed funds sold and in loan receivables of \$9.6 million which were offset in part by decreases in investments of \$9.8 million and due from banks of \$3.3 million, between those respective dates.

#### Loans:

The loan portfolio represents FBD's largest asset, and is its most significant source of interest income. Net loans increased \$9.6 million, or 13.5%, to \$80.9 million at September 30, 2009, versus \$71.3 million at December 31, 2008. The increase in loans was primarily the result of our community banking segment repurchase of past loan participations, which were sold to other banks. This purchase will allow us to earn additional interest income. The loan portfolio consists of commercial real estate, construction and other commercial loans, as well as consumer installment loans and credit card receivables. Commercial real estate loans comprise the majority of the loan portfolio. Commercial real estate loans amounted to \$58.6 million at September 30, 2009 compared to \$50.7 million at December 31, 2008. Construction and land development loans amounted to \$17.0 million and \$12.6 million respectively, at those dates. The increase in both categories reflect the higher amounts of loans retained by FBD instead of being participated to other banks. As of September 30, 2009, there were \$4.6 million of consumer loans and \$663,000 of credit card receivables outstanding. At December 31, 2008, there were \$4.0 million of consumer loans and \$1.1 million of credit card receivables outstanding.

#### Investment Securities:

Investment securities available-for-sale are investments which may be sold in response to changing market and interest rate conditions and for liquidity and other purposes. The investment securities available-for-sale consist primarily of U.S. Government agency issued mortgage backed securities. Available-for-sale securities totaled \$12.9 million at September 30, 2009, a decrease of \$9.8 million or 43.2%, from year-end 2008. This decrease resulted primarily from \$10 million in FHLB discount notes that matured between the periods and pay downs of mortgage-backed securities, offset by a \$970,000 government agency security purchased in July 2009. At September 30, 2009, and December 31, 2008, the portfolio had net unrealized gains of \$391,000 and \$427,000, respectively.

#### Cash and Cash Equivalents:

Cash and due from banks, interest-bearing deposits and federal funds sold comprise this category, which consists of FBD's most liquid assets. The aggregate amount in these three categories increased by \$16.4 million to \$26.0 million at September 30, 2009 from \$9.6 million at December 31, 2008. Federal funds sold increased by \$19.8 million between those respective dates, to \$23.7 million at September 30, 2009, reflecting the maturity of short-term securities.

#### Restricted Stock:

FBD is a member of the Federal Home Loan Bank of Pittsburgh ("FHLB") and, as such, had been required to maintain stock at FHLB in proportion to its outstanding FHLB advances, prior to the FHLB suspension of dividend payments in 2008. Since that suspension of dividend payments, the restricted stock has been frozen and not redeemed. Federal Home Loan Bank Stock holdings increased to \$415,000 at September 30, 2009 from \$139,000 at December 31, 2008. The increase was due to a short term borrowing in the first quarter of 2009. When the borrowings were repaid in the first quarter the stock was not redeemed in accordance with current Federal Home Loan Bank policy.

During the second quarter of 2009, FBD purchased \$60,000 of stock in Atlantic Central Bankers Bank ("ACBB") as a support to our line of credit with ACBB. The stock totaled \$60,000 at September 30, 2009 and \$0 at December 31, 2008. This amount is included in "Restricted Stock" on the balance sheet.

#### Premise and Equipment:

Premises and equipment, net of accumulated depreciation was \$2.8 million at September 30, 2009 and \$3.4 million at December 31, 2008, respectively. The decrease represented sales of assets at book value during the second quarter of 2009.

#### Bank Owned Life Insurance:

Bank owned life insurance amounted to \$1.8 million at September 30, 2009 and December 31, 2008. The income earned on these policies is reflected in non-interest income.

#### Deposits:

Deposits, which include non-interest and interest-bearing demand deposits, money market, savings and time deposits and brokered time deposits, represent the major sources of funding. Deposits are generally solicited from the Delaware market area through a variety of products to attract and retain customers, with a primary focus on multi-product relationships. We also obtain deposits from our card product customers.

Total deposits increased by \$15.1 million to \$87.4 million at September 30, 2009, from \$72.3 million at December 31, 2008. Average transaction account balances in the current quarter decreased \$13.7 million or 20.2% over the comparable prior year quarter. See "Analysis of Net Interest Income".

The decrease reflected the impact of terminating third party relationships related to consumer loans and credit cards. Time deposits increased \$17.2 million to \$29.6 million at September 30, 2009, versus \$12.4 million at December 31, 2008 due primarily to \$10 million in brokered time deposits issued in the second quarter 2009. The brokered deposits were utilized as they were less costly than local deposits.

#### Other Liabilities:

Other liabilities, including accrued interest payable and accrued expenses, decreased by \$1.2 million or 27.3% to \$3.2 million at September 30, 2009 from \$4.4 million at December 31, 2008. The decrease was primarily due to federal tax payments and deferred compensation plan distributions of \$384,000 in 2009.

### Shareholders' Equity:

Total shareholders' equity increased \$1.6 million to \$41.1 million at September 30, 2009, versus \$39.5 million at December 31, 2008. This increase primarily reflected net income of \$1.2 million and deferred compensation plan distributions of \$384,000.

#### Three Months Ended September 30, 2009 Compared to September 30, 2008

#### **Results of Operations:**

#### Overview

Our net income decreased to \$483,000 or \$0.04 per diluted share for the three months ended September 30, 2009, compared to \$925,000, or \$0.08 per diluted share for the comparable prior year period. The \$442,000 decrease in after tax net income reflected a \$257,000 decrease in consumer loan fee income, a \$690,000 decrease in income from credit card and prepaid card products and a \$233,000 decrease in loan sales. This decline reflected the termination of certain third party lending programs. FBD will close and transfer accounts related to our credit card marketer in the fourth quarter of 2009. This will have a material adverse impact on earnings. The income declines were partially offset by a \$852,000 reduction in non-interest expenses. Net interest income also decreased in third quarter 2009 to \$2.3 million from \$2.5 million in the comparable prior year period. These were the primary factors which resulted in a return on average assets and average equity of 1.53% and 4.74% respectively, in the third quarter of 2009 compared to 2.97% and 9.53% respectively for the same period in 2008.

#### Analysis of Net Interest Income

In addition to significant amounts of consumer loan and credit card fee income, historically, FBD's earnings have depended significantly upon net interest income, which is the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities. Net interest income is impacted by changes in the mix of the volume and rates of interest-earning assets and interest-bearing liabilities.

The following table sets forth an analysis of net interest income by major categories of interest earning assets and interest bearing liabilities and the related yields and costs for the three months ended September 30, 2009 and 2008.

Interest coming assets		ne un ee mi						- 111011uis ei

Net interest income	\$	(54)	\$ (138)	\$ (192)			

The net interest margin decreased 76 basis points to 8.05% for the three months ended September 30, 2009, versus the prior year comparable period. The decrease reflected a decrease in higher yielding average consumer installment loan balances and a reduction in yields on fed funds sold. The average yield on interest-earning assets also decreased 77 basis points to 8.86% for the three months ended September 30, 2009, from 9.63% for the prior year comparable period. Excluding higher yielding consumer installment loans in our consumer loan segment, net interest margins would have been approximately 4.04% in third quarter 2009 and 4.70% in third quarter 2008. The resulting 66 basis point decrease reflected the impact of a declining rate environment. The average rate paid on interest-bearing liabilities decreased 94 basis points to 1.59% for the three months ended September 30, 2009, from 2.53% in the prior year comparable period, as FBD did not renew higher priced fixed rate time deposits as we anticipated further declines in interest rates. Yields on total deposits decreased 2 basis points, to 1.14% in third quarter 2009 from 1.16% in third quarter 2008 primarily as a result of the declining rate environment, this was partially offset by decreased demand deposits from our loan and credit card relationships.

FBD's net interest income decreased \$192,000, or 7.6%, to \$2.3 million for the three months ended September 30, 2009, from \$2.5 million for the prior year comparable period. The decrease resulted primarily from lower loan balances and lower rates thereon.

Total interest income decreased \$193,000, or 7.0%, to \$2.6 million for the three months ended September 30, 2009, from \$2.8 million for the prior year comparable period. Interest and fees on loans decreased \$101,000, or 4.1% to \$2.4 million for the three months ended September 30, 2009, from \$2.5 million for the prior year comparable period. The decreases reflected those factors noted in the preceding paragraphs which discussed net interest margin and net interest income. Interest and dividends on investment securities increased \$39,000, or 32.5% to \$159,000 for the three months ended September 30, 2009, from \$120,000 for the prior year comparable period primarily reflecting the purchases of short term securities which increased the balances held though carried a lower yield which increased income but lead to a decrease in yield on our portfolio of 147 basis points from the prior year comparable period. Excess liquidity was generally invested in overnight federal funds sold. The Bank maintains excess liquidity in federal funds sold so that it is immediately available in the event of unforeseen liquidity requirements. Federal funds sold income decreased \$131,000, to \$16,000 in third quarter 2009, compared to \$147,000 in third quarter 2008. The decrease reflected lower average short-term interest rates which decreased the yield to 0.24% from 1.92% between those respective periods.

Total interest expense decreased \$1,000 to \$233,000 for the three months ended September 30, 2009, from \$234,000 for the prior year comparable period. That decrease reflected the impact of reduced levels of higher cost time deposits and lower short-term interest rates on the cost of interest-bearing liabilities which decreased 94 basis points to 1.59% in third quarter 2009 from 2.53% in third quarter 2008. The decrease in rates was offset by an increase in interest bearing liabilities. Average total interest-bearing liabilities increased \$21.6 million, or 58.9%, to \$58.3 million in third quarter 2009, from \$36.7 million in third quarter 2008.

Interest expense on time deposits (certificates of deposit) increased \$34,000, or 32.7%, to \$138,000 for third quarter 2009, from \$104,000 for the prior year comparable period. This increase reflected higher volumes in time deposits due to our retail and brokered CD offerings which were partially offset by reduced rates on those offerings. Average certificates of deposit outstanding increased \$14.9 million, or 123.1%, to \$27.0 million, from \$12.1 million in the prior year comparable period. The increase was primarily due to our issuance of brokered time deposits which averaged \$10.0 million during third quarter 2009. While local certificates of deposit are readily available, the brokered certificates were obtained at a significantly lower cost. Additionally, the lower interest rate environment also contributed to a decrease in average rate on certificates of deposit of 138 basis points to 2.02% for the quarter ended September 30, 2009 from 3.4% in the prior year comparable period.

#### **Provision for Loan Losses**

The provision for loan losses is charged to operations in an amount necessary to bring the total allowance for loan losses to a level that management determines is adequate to absorb losses inherent in our loan portfolio. The provision for loan losses increased \$125,000 to \$1.1 million for the three months ended September 30, 2009, from \$1.0 million for the prior year comparable period. Our provision expense was based on loan growth, general factors, the considerations of our primary federal regulator, the FDIC, and an increase in impaired loans. Management continues to review its loan portfolio to determine the extent, if any, to which additional loss provisions may be deemed necessary. There can be no assurance that the allowance for losses will be adequate to cover losses which may in fact be realized in the future and that additional provisions for losses will not be required.

#### **Non-Interest Income**

Total non-interest income decreased \$1.2 million to \$2.4 million for the three months ended September 30, 2009, versus \$3.6 million for the prior year comparable period. Credit and prepaid card product income decreased by \$690,000 or 29.4% for the three months ended September 30, 2009 compared to the quarter ended September 30, 2008. Revenue on card products is earned primarily on the number of active accounts, subject to certain minimum payments from our primary marketer. The decline in revenue reflected the termination of certain relationships. The primary marketer for our directly offered credit cards generated \$1.4 million in revenue or 28.1% of total revenue in third quarter 2009. The accounts with this marketer will be closed and transferred in the fourth quarter and we will no longer earn revenue on these accounts. Fees on consumer installment loans decreased by \$257,000 to \$525,000 or 32.9% for the three months ended September 30, 2009 compared to \$782,000 in the prior year comparable period primarily as a result of decreases in the volume of such products reflecting terminations of certain relationships.

#### **Non-Interest Expense**

Total non-interest expense decreased \$852,000, or 23.0% to \$2.8 million for the three months ended September 30, 2009, from \$3.7 million for the prior year comparable period. Salaries and employee benefits decreased \$162,000 or 8.6% for the three months ended September 30, 2009, from \$1.9 million for the prior year comparable period. The \$162,000 represented reductions in incentive compensation and outsourcing expenses.

Occupancy expense decreased \$11,000, or 7.0%, to \$147,000 for third quarter 2009, versus \$158,000 for third quarter 2008. The decrease reflected decreases in rent and maintenance expenses between the periods.

Depreciation expense decreased \$3,000, or 2.9% to \$102,000 for the three months ended September 30, 2009, versus \$105,000 for the prior year comparable period.

Legal fees increased \$8,000, or 9.0%, to \$97,000 in third quarter 2009, compared to \$89,000 in third quarter 2008.

Professional fees decreased \$274,000, or 71.4% to \$110,000 in third quarter 2009, compared to \$384,000 in the comparable prior year period. The decrease reflected consulting fees related to credit cards incurred in the third quarter of 2008, which did not recur in 2009.

Data processing expense decreased \$13,000, or 10.2%, to \$115,000 in third quarter 2009 from \$128,000 in third quarter 2008. The decrease reflected reduced processing charges related to our community banking functions.

Credit card program processing expense decreased to \$38,000 in third quarter 2009, compared to \$136,000 in the comparable prior year period. The decrease reflected the termination of the test of our directly offered credit card between the periods.

The FDIC assessment increased \$13,000 or 56.5% to \$36,000 in third quarter 2009 from \$23,000 in 2008. The increase in 2009 reflected an increase in our deposit base and assessment increases by the FDIC to recapitalize its insurance fund.

Delaware franchise tax decreased \$57,000, or 75.0%, to \$19,000 in third quarter 2009 from \$76,000 in third quarter 2008. The decrease resulted primarily from decreased taxable income.

Other expenses for the three months ended September 30, 2009, declined by \$255,000 from the prior year comparable period. The primary reason for the decrease was a \$304,000 fine, related to our consent agreement with the FDIC, which was included in expenses for third quarter of 2008. Exclusive of the fine expenses were comparable between the three month periods.

#### **Provision for Income Taxes**

The provision for income taxes decreased \$720,000, or 49.8% to \$727,000 for the three months ended September 30, 2009, from \$1.4 million for the prior year comparable period. The decrease was primarily the result of the decrease in pre-tax income. The effective tax rate was 34% for the three month period ended September 30, 2009 compared to 36% in the prior year comparable period. The reduction reflected a lower estimated tax rate and the impact of a fixed amount of tax free income on lower pre-tax income.

# Nine Months Ended September 30, 2009 Compared to September 30, 2008

# **Results of Operations:**

#### Overview

Our net income decreased to \$1.2 million or \$0.10 per diluted share for the nine months ended September 30, 2009, compared to \$4.6 million, or \$0.40 per diluted share for the comparable prior year period primarily reflecting lower non-interest income. The \$3.4 million decrease in after tax net income reflected a \$2.5 million decrease in consumer loan fee income and a \$2.6 million decrease in income from credit card and prepaid card products. This decline reflected the termination of certain third party lending programs. FBD will close and transfer accounts related to our credit card marketer in fourth quarter 2009. This will have a material adverse effect on income. The declines in non interest income were partially offset by reductions in non-interest expenses of \$2.5 million. Net interest income also decreased in 2009 to \$6.6 million from \$7.9 million in the prior year period as yields on our interest earning assets decreased at greater rate than our cost of funds. These were the primary factors which resulted in a return on average assets and average equity of 1.33% and 3.91% respectively, in the nine months ended 2009 compared to 4.99% and 16.49% respectively for the same period in 2008.

# Analysis of Net Interest Income

In addition to significant amounts of consumer loan and credit card fee income. FBD's earnings have depended significantly upon net interest income, which is the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities. Net interest income is impacted by changes in the mix of the volume and rates of interest-earning assets and interest-bearing liabilities.

The following table sets forth an analysis of net interest income by major categories of interest earning assets and interest bearing liabilities and the related yields and costs for the nine months ended September 30, 2009 and 2008.

Interest-earning assets:	September 30, 2009			September 30, 2008

Other borrowings	(2)	-	(2)		
Total interest expense	(117)	433	316		
Net interest income	\$ (340)	\$ (954)	\$ (1,294)		

Our net interest margin decreased 129 basis points to 8.08% for the nine months ended September 30, 2009, versus the prior year comparable period. The majority of the decrease reflected lower mezzanine financing balances, lower yields on commercial loans and a decrease in higher yielding average consumer installment loan balances. Without the higher yielding consumer loans in our consumer loan segment, net interest margins would have been approximately 3.41% for the first nine months of 2009 and 4.19% for the comparable prior year period. The resulting 78 basis point decline reflected the impact of a declining rate environment and the loss of \$2.8 million in high yielding mezzanine finance loans. The average rate paid on interest bearing liabilities decreased 133 basis points to 1.78% for the nine months ended September 30, 2009 from 3.11% in the prior year comparable period, as FBD chose not to renew higher priced fixed rate time deposits in anticipation of declines in interest rates. We issued brokered time deposits in the second quarter of 2009 totaling \$10 million, which, in the current environment, carry a significantly lower cost than inmarket time deposits. Yields on total deposits also decreased 46 basis points, to 1.14% in the nine months ended September 30, 2009 from 1.60% in the prior year comparable period primarily as a result of the declining rate environment. This was partially offset by lower average deposit balances.

Our net interest income decreased \$1.3 million, or 16.5%, to \$6.5 million for the nine months ended September 30, 2009, from \$7.8 million for the prior year comparable period. The decrease resulted primarily from lower loan balances and lower rates thereon.

Total interest income decreased \$1.6 million or 18.3%, to \$7.2 million for the nine months ended September 30, 2009, from \$8.8 million for the prior year comparable period. Interest and fees on loans decreased \$1.3 million, or 16.4%, to \$6.6 million for the nine months ended September 30, 2009, from \$7.9 million for the prior year comparable period. The decrease reflected those factors noted in the preceding paragraph. Interest and dividends on investment securities increased \$19,000, or 3.5%, to \$558,000 for the nine months ended September 30, 2009, from \$539,000 for the prior year comparable period. FBD purchased securities between the periods which more than offset maturing issues, but carried a lower yield which limited the increase in income. Federal funds sold income decreased \$332,000, or 91.5%, to \$31,000 in for the first nine months of 2009, compared to \$363,000 in the comparable prior year period. The decrease reflected the declining rate environment as yields decreased 207 basis points on fed funds sold to 0.25% from 2.32% between those respective periods. Average federal funds sold balances decreased as FBD reduced balances of higher cost time deposits funding such balances. Average federal funds sold decreased \$4.2 million, or 20.2%, to \$16.7 million from \$20.9 million in the comparable prior year period.

Total interest expense decreased \$316,000, or 32.3%, to \$643,000 for the nine months ended September 30, 2009, from \$959,000 for the prior year comparable period. That decrease reflected the impact of reduced levels of higher cost time deposits and lower short-term interest rates on the yield on interest-bearing liabilities. The yield on all interest bearing liabilities decreased 133 basis points to 1.78% in the first nine months of 2009 from 3.11% in the comparable prior year period. Total interest-bearing liabilities increased \$7.1 million between the periods, due primarily to the offering of brokered time deposits.

Interest expense on time deposits (certificates of deposit) decreased \$95,000, or 20.8%, to \$361,000 for the first nine months of 2009, from \$456,000 for the prior year comparable period. This decrease primarily reflected the maturity and non-renewal of higher cost certificates of deposit. Average certificates of deposit outstanding increased \$5.5 million, or 39.3%, to \$19.3 million, for the nine months ended September 30, 2009, from \$13.8 million in the prior year comparable period. The increase reflected an average of \$5.1 million in brokered time deposits which carry a significantly lower cost than our other time deposits. We began offering brokered time deposits in second quarter 2009.

#### **Provision for Loan Losses**

The provision for loan losses increased \$350,000 to \$3.4 million for the nine months ended September 30, 2009, from \$3.1 million for the prior year comparable period. Our provision expense was based on loan growth, general factors, the considerations of our primary federal regulator, the FDIC, and an increase in impaired loans. Management continues to review its loan portfolio to determine the extent, if any, to which additional loss provisions may be deemed necessary. There can be no assurance that the allowance for losses will be adequate to cover losses which may in fact be realized in the future and that additional provisions for losses will not be required.

## **Non-Interest Income**

Total non-interest income decreased \$6.3 million, or 45.3%, to \$7.6 million for the nine months ended September 30, 2009, versus \$13.9 million for the prior year comparable period. The \$6.3 million decrease resulted primarily from fee income on credit card products primarily earned on the number of active accounts which decreased substantially between the periods. The decline in revenue also reflected the termination of certain relationships. Additionally, incentive revenue was earned on the basis of card issuances from Mastercard. The Bank recorded incentive income related to issuing cards of \$132,000 included in card income for the nine months ended September 30, 2009 compared to \$1.4 million in the prior year comparable

period. The Bank retains some credit card loans on its books, for which the income in the first nine months of 2009 amounted to \$262,000 compared to \$1.1 million for the nine months ended September 30, 2008. The primary marketer for our credit cards generated \$4.3 million in revenue or 29.0% of total revenues of \$14.8 million in the nine months ended September 30, 2009. The accounts with this marketer will be closed and transferred in the fourth quarter and we will no longer earn revenue on these accounts. Consumer installment loan fee income decreased \$3.1 million to \$1.5 million in 2009 from \$4.6 million in the first nine months ended September 30, 2008 primarily as a result of decreases in the volume of such products reflecting terminations of certain relationships.

# **Non-Interest Expenses**

Total non-interest expenses decreased \$2.5 million or 21.7% to \$9.0 million for the nine months ended September 30, 2009, from \$11.5 million for the prior year comparable period. Salaries and employee benefits decreased \$612,000, or 10.0%, to \$5.5 million for the nine months ended September 30, 2009, from \$6.1 million for the prior year comparable period. The decrease primarily reflected reductions in incentive and outsourcing expenses.

Occupancy expense increased \$38,000, or 8.6%, to \$479,000 for the first nine months of 2009, versus \$441,000 for the comparable prior year period. The increase reflected increased rent and maintenance expenses.

Depreciation expense increased \$8,000, or 2.5% to \$324,000 for the first nine months of 2009, versus \$316,000 for the prior year comparable period.

Legal fees decreased \$73,000, or 27.2%, to \$195,000 in the first nine months of 2009, compared to \$268,000 in the comparable prior year period. The majority of the decrease reflected legal fees paid in 2008 related to new product development which included consumer installment loans, prepaid and credit cards and other loan products.

Professional fees decreased \$334,000, or 46.2% to \$389,000 in the first nine months of 2009, compared to \$723,000 in the comparable prior year period. The decrease reflected reduced consulting fees related to new product development efforts that were incurred in 2008.

Data processing expense decreased \$22,000, or 5.7%, to \$367,000 in the first nine months of 2009 from \$389,000 in the comparable prior year period.

Credit card program marketing expense decreased \$596,000 in the first nine months of 2009 as we terminated our directly offered card test between the periods.

Credit card program processing expense decreased to \$218,000 in the first nine months of 2009, compared to \$673,000 in the comparable prior year period. The decrease reflected the reduction in processing and servicing expenses, which were incurred during 2008 and did not recur in 2009, relating to the Bank's directly offered credit card test, which was terminated in 2008.

The FDIC assessment increased \$70,000, or 134.6% to \$122,000 in the first nine months of 2009, compared to \$52,000 in the comparable prior year period. The increase in 2009 reflected an additional assessment by the FDIC to recapitalize its insurance fund.

Delaware franchise tax decreased \$317,000, or 84.8%, to \$57,000 in the first nine months of 2009 from \$374,000 in the comparable prior year period. The decrease resulted primarily from decreased taxable income.

Other expenses for the nine months ended September 30, 2009, decreased \$254,000 to \$1.3 million in year to date 2009 from \$1.6 million in the prior year comparable period. The decrease was primarily due to a fine of \$304,000 assessed in third quarter 2008, otherwise the other expenses were comparable between the periods. Other real estate owned expense increased \$31,000 and in 2009 there was a \$65,000 expense related primarily for ACH processing expenses, which were partially offset by declines in other areas.

## **Provision for Income Taxes**

The provision for income taxes decreased \$2.0 million to \$607,000 for the nine months ended September 30, 2009, from \$2.6 million for the prior year comparable period. This decrease was primarily the result of the decrease in pre-tax income. The effective tax rate was approximately 34% in 2009 and 35.9% in 2008. The reduction reflected a lower estimated tax rate and the impact of a fixed amount of tax free income on lower pre-tax income.

# **Commitments, Contingencies and Concentrations**

FBD is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit totaling \$15.6 million at September 30, 2009. These instruments involve to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements.

Credit risk is defined as the possibility of sustaining a loss due to the failure of the other parties to a financial instrument to perform in accordance with the terms of the contract. The maximum exposure to credit loss under commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. FBD uses the same underwriting standards and policies in making credit commitments as it does for on-balance-sheet instruments.

Financial instruments whose contract amounts represent potential credit risk were comprised of commitments to extend credit of approximately \$15.4 million and \$166.8 million and standby letters of credit of approximately \$186,000 and \$131,000 at September 30, 2009, and December 31, 2008, respectively. The \$151.4 million decline in commitments was primarily due to credit market effects on our credit card marketer. We have closed the commitment lines on these accounts and will transfer these accounts in the fourth quarter. The commitments for 2009 and 2008 respectively include \$7.9 million and \$160.7 million in credit card commitments for which the resulting outstanding balances are sold after funding. The Bank has the unilateral right to cancel the unused lines, in the unlikely event that the purchaser is unable to fulfill their contractual requirement to purchase the receivables, should that become necessary or desirable. The Bank has written contingency plans that document the steps required to effectuate the termination of credit card lines. Also, the purchasers maintain deposit balances at FBD which provide support for daily card funding. FBD closely monitors the liquidity resources of each purchaser.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and many require the payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. FBD evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include real estate, marketable securities, pledged deposits, equipment and accounts receivable.

Standby letters of credit are conditional commitments that guarantee the performance of a customer to a third party. The credit risk and collateral policy involved in issuing letters of credit is essentially the same as that involved in extending loan commitments. The amount of collateral obtained is based on management's credit evaluation of the customer. Collateral held varies but may include real estate, marketable securities, pledged deposits, equipment and accounts receivable.

# **Regulatory Matters**

The following table presents the FBD's capital regulatory ratios at September 30, 2009, and December 31, 2008:

	Actu	ıal	For Ca Adequacy F	•	To be capitalize regulatory guidel	d under / capital
(Dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio
At September 30, 2009						
Total risk based capital	\$42,062	45.30%	\$7,428	8.00%	\$9,285	10.00%
Tier 1 risk based capital	40,867	44.01	3, 714	4.00	5,572	6.00
Tier 1 leverage capital	40,867	32.78	4,987	4.00	6,234	5.00
At December 31, 2008						
Total risk based capital	\$40,358	45.07%	\$7,164	8.00%	\$8,955	10.00%
Tier 1 risk based capital	39,216	43.79	3,582	4.00	5,373	6.00
Tier 1 leverage capital	39,216	32.21	4,870	4.00	6,088	5.00

In the third quarter of 2009 a special assessment was paid by all insured depository institutions to replenish the FDIC Deposit Insurance Fund. We have paid \$45,000 to cover that assessment.

# Liquidity

Financial institutions must maintain liquidity to meet day-to-day requirements of depositors and borrowers, take advantage of market opportunities and provide a cushion against unforeseen needs. Liquidity needs can be met by utilizing cash and federal funds sold, converting assets to cash through security repurchase or sale various or drawing upon lines of credit cash generated by increasing deposits represents the primarily source of liquidity.

Regulatory authorities require FBD to maintain certain liquidity ratios and to maintain available funds, or the capability to obtain available funds at reasonable rates, in order to satisfy commitments to borrowers and the demands of depositors. In response to these requirements, FBD has formed an Asset/Liability Committee ("ALCO"), comprised of selected members of the FBD board of directors and senior management, which monitor such ratios. The purpose of the Committees is in part, to monitor FBD's liquidity and adherence to the ratios in addition to managing the relative interest rate risk. ALCO meets at least quarterly.

FBD's most liquid assets, consisting of cash and due from banks, interest bearing deposits with banks and federal funds sold, totaled \$26.0 million at September 30, 2009, compared to \$9.5 million at December 31, 2008, due primarily to a \$20.0 million increase in federal funds sold. Loan maturities and repayments, if not reinvested in loans, also are immediately available for liquidity. Funding requirements have historically been satisfied primarily by generating core deposits and certificates of deposit with competitive rates. At September 30, 2009, FBD had aggregate outstanding commitments (including unused lines of credit and letters of credit) of \$15.6 million. The commitments include \$7.9 million in credit card commitments for which the resulting balances are sold after funding. Therefore such amounts are not indicative of actual future liquidity requirements. The Bank has the unilateral right to cancel the unused lines should that become

necessary or desirable, in the unlikely event that the purchaser is unable to fulfill their contractual obligations. The Bank has written contingency plans that document the steps required to effectuate the termination of credit card lines. Also, the purchasers maintain deposit balances at FBD which provide support for daily card funding. We closely monitor the liquidity resources of each purchaser. Certificates of deposit scheduled to mature in one year totaled \$28.9 million at September 30, 2009. FBD anticipates that it will have sufficient funds available to meet its current commitments.

Target and actual liquidity levels are determined by comparisons of the estimated repayment and marketability of interest-earning assets and projected future outflows of deposits and other liabilities. FBD is a member of the Federal Home Loan Bank ("FHLB") and has a credit line exceeding \$21 million, all of which was available at September 30, 2009. We have also established a line of credit from a correspondent bank, Atlantic Central Bankers Bank ("ACBB"), to assist in managing our liquidity position. That line of credit totaled \$4.0 million and was unused at September 30, 2009. Our securities portfolio also represents a source of liquidity for FBD. Accordingly, investment decisions may reflect liquidity over other considerations.

FBD's primary short-term funding sources are certificates of deposit and our securities portfolio. The circumstances that are reasonably likely to affect those sources are as follows. FBD has historically been able to generate certificates of deposit by matching Philadelphia and Delaware market rates or paying a premium rate of 25 to 50 basis points over those market rates. Brokered deposits are also available for liquidity and as lower cost funding option. The brokered deposits are used modestly, as the Bank primarily uses locally obtained deposits for its funding requirements. It is anticipated that these sources of liquidity will continue to be available; however, their incremental cost may vary depending on market conditions. The securities portfolio is also available for liquidity. Numerous investment companies would likely provide repurchase agreements up to the amount of the market value of the securities.

The ALCO is responsible for managing liquidity and interest sensitivity. Its primary objective is to maximize net interest income while configuring the interest-sensitive assets and liabilities to manage interest rate risk and provide adequate liquidity.

## **Investment Securities Portfolio**

At September 30, 2009, FBD had identified certain investment securities that are being held for indefinite periods of time, including securities that will be used as part of FBD's asset/liability management strategy and that may be sold in response to changes in interest rates, prepayments and similar factors. These securities are classified as available for sale and are intended to increase the flexibility of FBD's asset/liability management. Available for sale securities consisted primarily of US Government Agency securities. The book and market values of investment securities available for sale were approximately \$12.5 and \$12.9 million as of September 30, 2009. The net unrealized gain on investment securities available for sale as of that date was \$391,000.

## Loan Portfolio

FBD's loan portfolio consists of secured and unsecured commercial loans including commercial real estate loans, loans secured by one-to-four family residential property, commercial construction and residential construction loans as well as residential mortgages, home equity loans, short-term consumer credit card loans and other consumer loans. Commercial loans are primarily term loans made to small to medium-sized businesses and professionals for working capital, asset acquisition and other purposes. Commercial loans are originated as either fixed or variable rate loans with typical terms of 1 to 5 years. FBD's commercial loans typically range between \$250,000 and \$2,000,000 but customers may borrow significantly larger amounts up to the secured legal lending limit of approximately \$11.2 million at September 30, 2009. Individual customers may have several loans often secured by different collateral.

Net loans increased \$9.6 million, to \$80.9 million at September 30, 2009, from \$71.3 million at December 31, 2008. The increase was primarily the result of our repurchase of loan participations which generated additional interest income.

The following table sets forth the gross loans by major categories for the periods indicated:

(dollars in thousands)	As of September 30, 2009			As of December 31, 2008		
	Bala	nce	% of Total	Balan	ice	% of Total
Commercial:						_
Real estate secured	\$	58,607	69.1	\$	50,678	68.3
Construction and land development		16,994	20.0		12,594	17.0
Non real estate secured		2,967	3.5		4,614	6.2
Unsecured		990	1.2		990	1.3
		79,558	93.8		68,876	92.8
Subprime credit card receivables		663	0.8		1,336	1.8
Subprime consumer installment loans		4,559	5.4		4,004	5.4
Consumer - other loans		48	0.1		26	0.0
Total loans		84,828	100.0%		74,242	100.0%
Less: allowance for loan losses		(3,923)			(2,935)	
Net loans	\$	80,905		\$	71,307	

# **Credit Quality**

FBD's written lending policies require specified underwriting, loan documentation and credit analysis standards to be met prior to funding, with independent credit department approval for the majority of new loan balances. A committee of the board of directors oversees the loan approval process to monitor that proper standards are maintained, while approving the majority of commercial loans.

Loans, including impaired loans, are generally classified as non-accrual if they are past due as to maturity or payment of interest or principal for a period of more than 90 days, unless such loans are well-secured and in the process of collection. Loans that are on a current payment status or past due less than 90 days may also be classified as non-accrual if repayment in full of principal and/or interest is in doubt.

Loans may be returned to accrual status when all principal and interest amounts contractually due are reasonably assured of repayment within an acceptable period of time, and there is a sustained period of repayment performance by the borrower, in accordance with the contractual terms.

While a loan is classified as non-accrual or as an impaired loan and the future collectability of the recorded loan balance is doubtful, collections of interest and principal are generally applied as a reduction to principal outstanding. When the future collectability of the recorded loan balance is expected, interest income may be recognized on a cash basis. In the case where a non-accrual loan had been partially charged off, recognition of interest on a cash basis is limited to that which would have been recognized on the recorded loan balance at the contractual interest rate. Cash receipts in excess of that amount are recorded as recoveries to the allowance for loan losses until prior charge-offs have been fully recovered.

The following summary shows information concerning loan delinquency and other non-performing assets at the dates indicated.

	September 30, 2009	December 31, 2008
(dollars in thousands)		
Loans accruing, but past due 90	\$	
days or more	-	\$ -
Non-accrual loans	936	2,116
Total non-performing loans (1)	936	2,116
Other real estate owned	1,049	293
Total non-performing assets (2)	\$ 1,985	\$ 2.409
Non-performing loans as a percentage of total loans net of unearned income		
	1.10%	2.85%
Non-performing assets as a		
percentage of total assets	1.51%	2.07%

- (1) Non-performing loans are composed of (i) loans that are on a nonaccrual basis; (ii) accruing loans that are 90 days or more past due and (iii) restructured loans.
- (2) Non-performing assets are composed of non-performing loans and other real estate owned (assets acquired in foreclosure).

Non accrual-loans of \$936,000 at September 30, 2009 decreased from \$2.1 million at December 31, 2008, primarily as a result of the transfer of \$834,000 of non accrual commercial loans to other real estate owned in first quarter 2009 and a \$178,000 reduction in consumer installment non accrual loans. The \$834,000 transfer represented two loans to a single borrower, after a \$363,000 charge-off. During the period a loan of \$252,000 was transferred to non accrual. There were no loans accruing, but past due 90 days or more at September 30, 2009.

Problem loans consist of loans that are included in performing loans, but for which potential credit problems of the borrowers have caused management to have serious doubts as to the ability of such borrowers to continue to comply with present repayment terms. At September 30, 2009, all identified problem loans are included in the preceding table or are internally classified with a specific reserve allocation in the allowance for loan losses (see "Allowance For Loan Losses"). Management believes that the appraisals and other estimates of the value of the collateral pledged against the non-accrual loans generally exceed the amount of its outstanding balances.

The recorded investment in loans which are impaired totaled \$2.3 million at September 30, 2009 and \$2.1 million at December 31, 2008, and the amount of related valuation allowances was \$420,000 and \$1.0 million respectively of those dates. There were no commitments to extend credit to any borrowers with impaired loans as of the end of the periods presented herein.

At September 30, 2009, and December 31, 2008, internally classified accruing loans totaled approximately \$2.0 and \$0 million respectively.

We do not classify our consumer loans and credit cards as substandard; however, they may be classified as such for regulatory purposes, due to the weakened credit characteristics of the borrowers. We had delinquent loans as follows: (i) 30 to 59 days past due, in the aggregate principal amount of \$494,000 at September 30, 2009 and \$174,000 at December 31, 2008; and (ii) 60 to 89 days past due at September 30, 2009 and December 31, 2008, in the aggregate principal amount of \$67,000 and \$269,000, respectively.

#### **Other Real Estate Owned:**

There were two properties held in other real estate owned at September 30, 2009 with a value of \$1.0 million. A total of \$834,000 secured by land and improvements for new condominium construction was transferred to other real estate owned in first quarter 2009. There were two loans totaling \$1.2 million secured by that property, of which \$363,000 was charged off, with the balance of \$834,000 transferred to other real estate owned. We also recorded proceeds of \$79,000 during the third quarter 2009 from sales of other real estate owned.

At September 30, 2009, FBD had no credit exposure to "highly leveraged transactions" as defined by the FDIC.

#### Allowance for Loan Losses

An analysis of the allowance for loan losses for the nine months ended September 30, 2009, and 2008, and the year ended December 31, 2008 is as follows:

(dollars in thousands)	For the nine months ended September 30, 2009	For the year ended December 31, 2008	For the nine months ended September 30, 2008
Balance at beginning of period	\$2,935	\$ 2,581	\$2,581
Commercial and commercial real estate	154	170	307
Construction and land development	363 739	1,450	- 827
Unsecured consumer loans	1,540	2,508 137	1,996
Total charge-offs	2,796	4,265	3,130
Recoveries:  Commercial and commercial real estate	-	-	
Credit cards	11 327 46	4 392 38	38 3 376
Total recoveries	384	434	417
Net charge-offs	2,412 3,400	3,831 4,185	2,713 3,050
Balance at end of period	\$3,923	\$2,935	\$2,918
Average loans outstanding (1)	\$73,771	\$77,004	\$77,785
As a percent of average loans (1):  Net charge-offs (annualized)	4.36%	4.98%	4.65%
Provision for loan losses (annualized)	6.15%	5.43%	5.22%
Allowance for loan losses	5.32%	3.81%	3.75%
Allowance for loan losses to:  Total loans, net of unearned income at period end	4.62%	3.95%	3.92%
Total non-performing loans at period end  (1) Includes nonaccruing loans.	419.12%	138.71%	132.82%

Management makes at least a quarterly determination as to an appropriate provision from earnings to maintain an allowance for loan losses that management believes is adequate to absorb losses inherent in our loan portfolio. The board of directors periodically reviews the status of all non-accrual and impaired loans and loans classified by regulators or internal loan review officer, who reviews both the loan portfolio and overall adequacy of the allowance for loan losses. The board of directors also considers specific loans, pools of similar loans, historical charge-off activity, economic conditions and other relevant factors in reviewing the adequacy of the loan loss reserve. Any additions deemed necessary to the allowance for loan losses are

charged to operating expenses. We have an existing loan review program, which monitors the loan portfolio on an ongoing basis.

Estimating the appropriate level of the allowance for loan losses at any given date is difficult, particularly in a continually changing economy. In our opinion, the allowance for loan losses was adequate to absorb losses at September 30, 2009. However, there can be no assurance that additions to the allowance for loan losses will not be required.

In the first quarter of 2009, the bank charged off \$363,000 on two loans to one borrower which were secured by land and improvements for new condominium construction in Lewes, Delaware. The remainder of this loan was transferred to other real estate owned. In the second quarter of 2009, we charged off \$154,000 on a loan secured by an apartment building in New York City. It is not feasible to determine in which loan category future charge-offs and recoveries may occur. The entire allowance for loan losses is available to absorb loan losses in any loan category. The majority of the loan portfolio represents loans made for commercial purposes, while significant amounts of residential property may serve as collateral for such loans. FBD attempts to evaluate larger loans individually, on the basis of its loan review process, which scrutinizes loans on a selective basis, and other available information. Even if all commercial purpose loans could be reviewed, there is no assurance that information on potential problems would be available. The portfolio of consumer loans is evaluated in groups.

# ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, we are not required to provide the information otherwise required by this item.

#### ITEM 4: CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

Our Chief Executive Officer and Chief Financial Officer, with the assistance of management, evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") as of the end of the period covered by this report (the "Evaluation Date"). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective to ensure that information required to be disclosed in our reports under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

## (b) Changes in internal controls.

As previously reported in the Company's Current Report on Form 8-K filed with the SEC on September 15, 2009, Paul Frenkiel resigned his position as Executive Vice President and Chief Financial Officer of First Bank of Delaware on September 14, 2009, and on such date Alonzo J. Primus, the current Chief Executive Officer and President of the Bank, was appointed to serve as the acting Chief Financial Officer of First Bank

of Delaware". Mr. Primus is now both the Principal Executive Officer and the Principal Financial Officer of FBD.

# PART II: OTHER INFORMATION

# ITEM 1: LEGAL PROCEEDINGS

On April 21, 2009, Yulon Clerk ("Plaintiff") filed a putative class action complaint ("Complaint") in the Pennsylvania Court of Common Pleas for Philadelphia County against the Bank, ACE Cash Express, Inc., d/b/a America's Cash Express ("ACE"), Eastern Specialty Finance, Inc., d/b/a Check 'n Go ("CNG"), and nineteen other defendants. On May 19, 2009, the Bank and other defendants removed the action to the United States District Court for the Eastern District of Pennsylvania. The matter is captioned as *Clerk v. Cash America Net of Nevada, LLC, et al.*, Case No. 2:09-cv-2245-NS.

In the action, Plaintiff seeks to certify a class of all Pennsylvania residents who obtained and made payments on a loan or advance of money on credit in an amount less than \$25,000 from the defendants during an indeterminate period at an interest rate exceeding nine percent per annum. According to the Complaint, the interest rate for each and all of these loans exceeds the interest rate permitted by Pennsylvania law.

The relief requested by Plaintiff for herself and for the putative class includes: restitution of all excess interest and charges collected by defendants; treble damages for interest payments exceeding the statutory rate; disgorgement of all revenue, profits, benefits and monies obtained by defendants and interest thereon; injunctive relief; and actual and statutory damages, attorneys' fees and costs.

On June 8, 2009, the Bank, ACE, and CNG filed motions to compel arbitration and stay litigation. On July 8, 2009, the Plaintiff filed oppositions to the motions to compel arbitration. On July 24, FBD, ACE, and CNG filed reply briefs.

By order dated August 20, 2009, Judge Norma L. Shapiro of the United States District Court for the Eastern District of Pennsylvania severed the Plaintiff's claims against the Bank from the claims against the other defendants and ordered Plaintiff to file an amended complaint against the Bank alone within 30 days or the case against the Bank would be dismissed.

On September 23, 2009, Plaintiff Yulon Clerk filed a putative class action complaint ("Complaint") against First Bank of Delaware (the "Bank") in the Court of Common Pleas for Philadelphia County. The case was captioned as Clerk v. First Bank of Delaware d/b/a Eastern Specialty Finance, Inc., d/b/a Check 'n Go, Case No. 090902279.

On November 6, 2009, the Bank removed the action to the United States District Court for the Eastern District of Pennsylvania. The matter is captioned as Clerk v. First Bank of Delaware d/b/a Eastern Specialty Finance, Inc., d/b/a Check 'n Go, Case No. 2:09-cv-5121-JD and is currently assigned to Senior District Judge Jan E. Dubois.

At this time, it is too early to determine the likelihood of an unfavorable outcome or the ultimate liability, if any, resulting from this case. We expect that our defense costs will be paid by other defendants pursuant to

contractual indemnification agreements, and we expect that any liability resulting from this case will be paid by the other defendants pursuant to the same indemnification agreements.

We previously reported on administrative enforcement actions taken by the FDIC and Illinois Department of Financial & Professional Regulation, Division of Financial Institutions in our Annual Report on Form 10-K for the year ended December 31, 2008, and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2009. There were no material developments with respect to either of these action during the quarter ended September 30, 2009.

We also previously reported in our Annual Report on Form 10-K for the year ended December 31, 2008, and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2009, on an action filed by the San Francisco City Attorney in the name of the People of the State of California in the Superior Court of the State of California, County of San Francisco, against First Bank of Delaware, Monetary Management of California, Inc. and Money Mart Express, Inc., and Check 'N Go of California, Inc. and its affiliated companies. On April 2, 2009, the Bank answered the First Amended Complaint denying all of the material allegations therein. Since then, the parties have continued to participate in the discovery process, with the Bank and the other defendants responding to discovery requests served by the City Attorney. It is expected that the discovery process will continue at least into 2010.

From time to time we may be party to other lawsuits that occur in the ordinary course of business. While any litigation involves an element of uncertainty, our management is of the opinion that our liability, if any, resulting from any such actions that are currently pending will not have a material effect on our financial condition or results of operations.

#### ITEM 6: EXHIBITS

The following Exhibits are filed as part of this report. (Exhibit numbers correspond to the exhibits required by Item 601 of Regulation S-K)

## Exhibit No.

- 31.1 Rule 13a-14(a) Certification of the Chief Executive Officer
- 32.1 Section 1350 Certification of the Chief Executive Officer

# **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the Issuer has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

First Bank of Delaware

Alonzo J. Primus
President and Chief Executive Officer
Acting Chief Financial Officer

Dated: November 13, 2009

#### **CERTIFICATION**

- I, Alonzo J. Primus, certify that:
- 1. I have reviewed this quarterly report on Form 10-Q of First Bank of Delaware (the "company");
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the company as of, and for, the periods presented in this report;
- 4. The company's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the company and have:
  - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) evaluated the effectiveness of the company's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) disclosed in this report any change in the company's internal control over financial reporting that occurred during the company's most recent fiscal quarter (the company's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting; and
- 5. The company's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the company's auditors and the audit committee of the company's board of directors :
  - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the company's ability to record, process, summarize and report financial information; and
  - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the company's internal control over financial reporting.

Date: November 13,

2009

Alonzo J. Primus President and Chief Executive Officer Acting Chief Financial Officer

# CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350 AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report on Form 10-Q for the quarter ended September 30, 2009, as filed with the Federal Deposit Insurance Corporation by First Bank of Delaware ("FBD") on the date hereof (the "Report"), I, Alonzo J. Primus, Chief Executive Officer of FBD, certify, pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the FBD.

Date: November 13, 2009	Ву:
	Alonzo J. Primus
